### Tell me more

- Transplanting Gel contains advanced polymers that provide adhesion as well as conditioning and moisturizing properties.
- Pro-vitamin B5 is known to attract and hold moisture while Vitamin E and Chamomilla Flower Extract are known for their high-quality skin conditioning properties.
- Nylon fibers dry quickly and adhere to Transplanting Gel for smoother coating.
- Fibers are formulated with squalane and CoQ10, ingredients known for their conditioning properties.
- Transplanting Gel applicator provides volume, separation, and length.
- Brush bristles are spaced evenly to help separate for longer-looking lashes, while 3D Fibers fill and add volume to lashes.

### Application Tips

1. Apply an even coat of Transplanting Gel to lashes.
2. Immediately apply 3D Fibers while Transplanting Gel is wet.
3. Seal the 3D Fibers with Transplanting Gel. Repeat until you've reached desired fullness.

TIP: For best application, do step 1 and 2 on one eye, move to the next eye and perform step 1 and 2, then return to first eye to perform step 3, and then finish with step 3 on second eye.
