Application tips

- 1. Start with clean lashes.
- 2. Place the brush on the lid side of your lashes and gently sweep from the middle of your lashes to the tips each night before bed.
- 3. To avoid momentary tingling that may occur if product comes into contact with the eye, avoid getting product too close to the lash root. Allow product to dry completely before sleeping.
- 4. For maximum effect, repeat application in the morning. Allow product to dry completely before applying mascara.
- 5. Use daily for four weeks. Reduce use to three times per week once you are satisfied with the appearance of your lashes.
